

Turnkey Solutions

KUNZ Aircraft Equipment

KUNZ services for Turnkey Solutions

Market analysis based on factors such as cost efficiency and availability of required equipment

Selection of the best machines tailored to shop requirements and latest technology

Evaluation of the resulting space requirements

Delivery and positioning of the machines with design of a shop layout to assure an efficient workflow

Workshop
with a **lean
workflow**
design

Optimized
and highly
efficient
workshop

Short and simple handling distances

Easy production overview

No working against workflow direction

Implementation of NEW Technology

Maximum efficiency with reduced workload

Ergonomically and environmentally friendly

IDENTIFY

- Existing Issues
- Final goals
- Target throughput
- Future scope of works

REVIEW

- Existing layout
- Space requirements
- Existing machinery
- Required machinery
- Actual procedures and cycle times

DEVELOP & DESIGN

in order to DEFINE SPACE for best suiting
WORKFLOWS

- Provide, upgrade or relocate equipment
- Calculate required work force
- Ascertain throughput
- Arrange „On the Job-Training“

RESULTS

- Decrease complexity
- Achieve maximum Overview & Transparency
- Implement New Technology
- Improve Efficiency & Capacity
- Avoid wasting resources
- Measure Success

Thank you!
