WHEEL & BRAKE SHOP EQUIPMENT

Brake Assembly & Disassembly

KUNZ BBS

- Break Build-Up Stand

KUNZ UTT

- Universal Torque Tool

KUNZ BDU

- Brake Drain Unit

KUNZ Spring Tester

KUNZ BBS – Brake Build-Up Stand

P/N: 225.0000

- Allows the assembly and disassembly of one sided and double sided screwed brakes.
- Consists of a foot pump driven hydraulic cylinder, an extension shaft with notches and the associated clamping disc.
- Space saving and convenient working height.

KUNZ UTT - Universal Torqueing Tool for brakes

P/N: 181.0000

- Features a single spindle nut runner/setter with reaction absorbing lift/lower device.
- Precise, fast and convenient torqueing of brakes.
- Can save up to one hundred different programs based on the different wheel models and associated torque parameters.

Kunz BDU - Brake Drain Unit

P/N: 227.2000

- Allows to evacuate brake cylinders of hydraulic aircraft brakes securely and conveniently without the need of a hydraulic press.
- Vacuum pump drains all hydraulic oil which is in the brake cylinders and directs it to the container.
- Covers all sizes of commercial and military aircraft brakes.
- Designed as a trolley with rollers for easy in-shop movement. The piston housing is placed on the platform, which also functions as a catch basin.

KUNZ Spring Tester

P/N: 235.0000

- Programmable Spring Tester for aircraft brake spring inspection & compression check based on the requirements of the brake CMM.
- Up to 99 spring programs can be easily created and saved.
- Springs can be tested in two different modes: spring compression height & spring load.
- System automatically gives an alarm if tested spring is out of tolerance.

Thank you!
